

Concept:

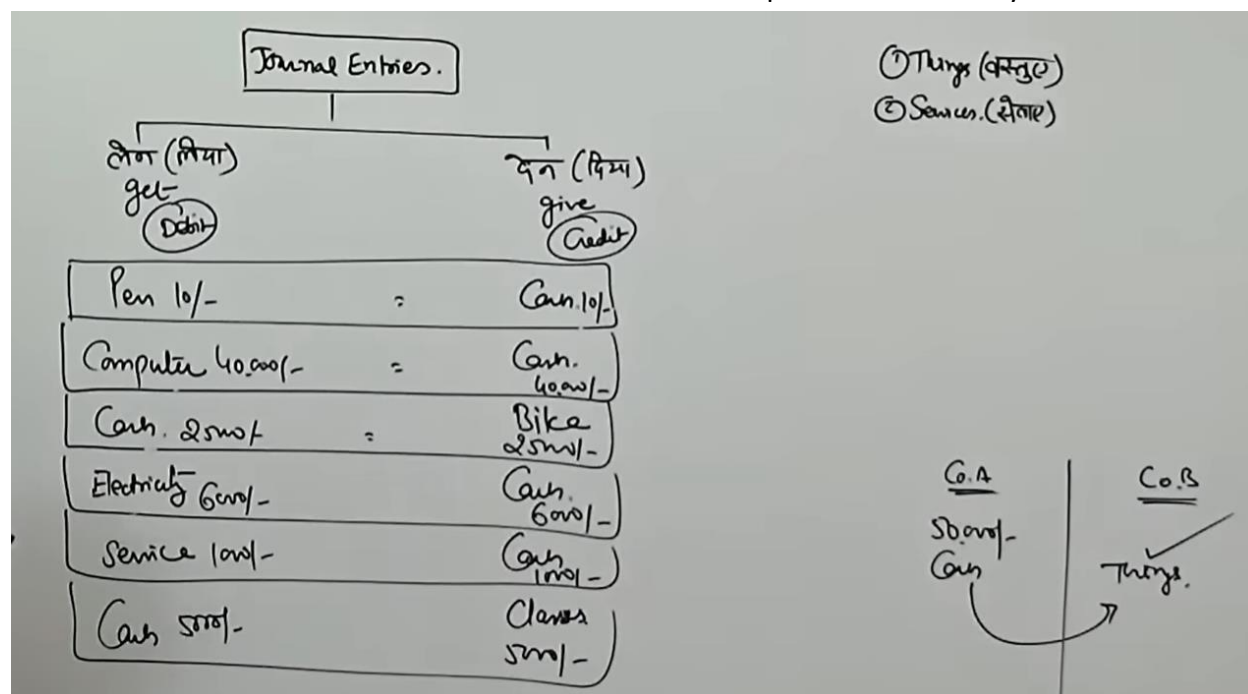

Kisi b Business me koi b Financial transaction jo huwa uski detail Journal Entry ha. Business me Paisa, Assets, Liabilities, Ya koi b service ka Lain Dain huwa, Tou ismy jo value increase hoi jo ya decrease hoi usko Record krna Journal entry ha.

→ Journal Entry me Double Entry system follow krna hta ha. Means k agr koi transaction hta ha tou usy 2 parts me divide kr dety -> Accounts me in 2 parts ko DEBIT and CREDIT ka name dety.

→ Accounts me koi value ati ha tou wo just aik Number nhi hta, Wo aik Financial Value hti ha Rupees me baat hti ha.. 2000 Rupee.

→ Accounts me ye Values "+ Ya -" nhi boli jati, inko bola jata ha -> debit ho rhi ha Ya Credit.

Ab in values ko kb Debit bolna ha aur kb credit isi ka concept ha "Journal Entry".

→ Hm daily life se hi dekhna shuru kry tou hm jb b kuch le rhy hain (Get) kr rhy tou usky bdly me kuch de b rhy hty hain, Agr hm koi Thing ya service le rhy tou usky bdly me kuch de rhy ha (Give). Tou get krny ko Hm Debit ka naam dein gy aur Give ko Credit ka naam dein Journal Entries me.

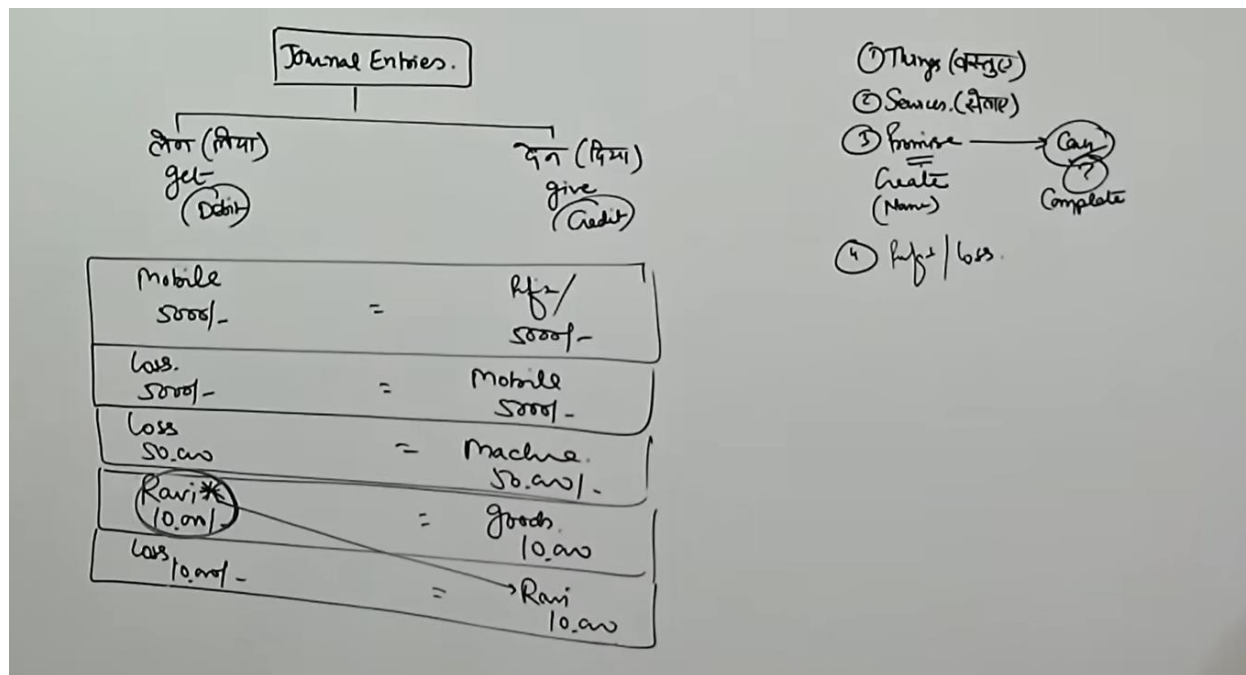

→ Agr hm Services get kr rhy hain tou hm uskalye Cash Give kr rhy jo k Credit ho rha aur services Debit.

→ Agar hum Cash Get kar rahe tou uske liye main Service de rahi, Tou service Credit aur cash Debit. Hm ye janna hta k get kya ho rha aur give kya ho rha.

→ Sometimes, aesa b hta k hm koi service ya thing le rhy ya de rhy tou hm uskalye aik promise kr rhy hty, jo k bd me fulfill hta ha. Agr hm Promise le rhy ha tou wo Debit ho ga, Aur hm Promise de rhy ha tou wo Credit ho ga.

→ Next Condition, Hm kuch de rhy ha (Give-> Credit), but hm Usky badly me kuch nhi mil rha, jo

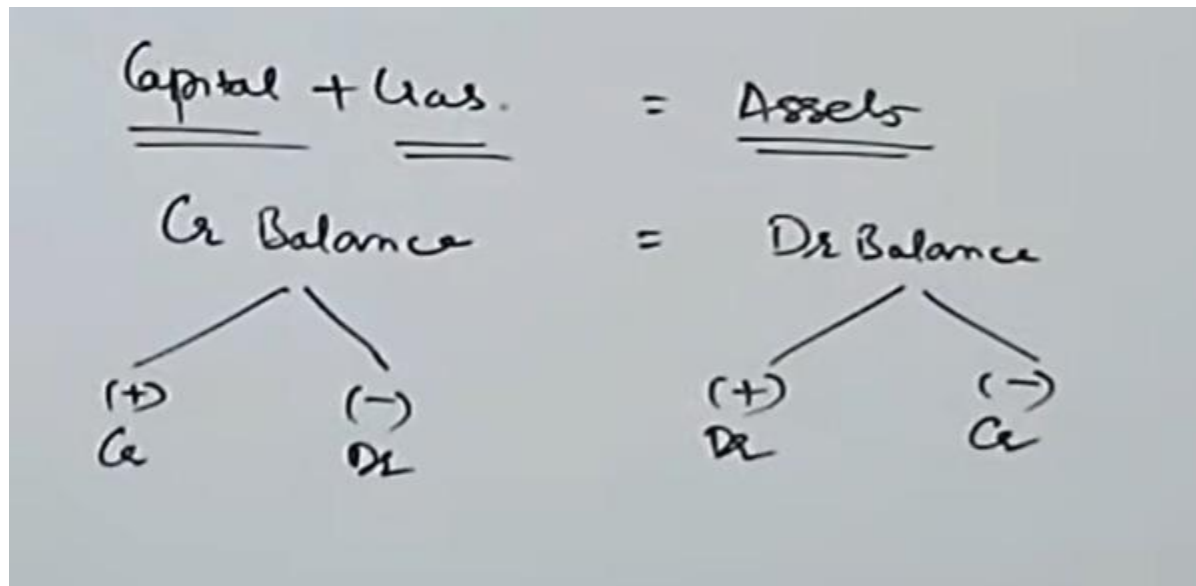

k Loss ha aur loss Debit ho jaye ga. Aur hm ne kuch le lya (Get-> Debit). Lkn usky badly me hm ne kuch nhi dya tou Profit ha, aur Ye Profit Credit ho jaye ga.

Methods:

1- Capital + Liabilities = Assets

"Assets" Debit Balance ha , Tou Debit = Credit Balance hta ha isiliye "Capital + Liabilities" Credit Balance hoga. Ab agr Assets me increase ho rha ha tou wo Debit ho ga aur decrease Credit. Same "Capital + Liabilities" Credit Balance ha tou inme increase Credit ha aur decrease Debit.

Example 1- Mne aik Business 50,000 se start kiya:

50,000 Cash ha, jo k Asset ha tou ye Debit ho ga. Ye 50,000 Capital ha jo k amount hti jis se business start hta Ye credit ha. "Credit = Debit"

Example 2- Purchase Goods for Cash 7,000

Goods Hmara Assets hta ha, Tou Goods ka get krna Assets me Debit ha, aur inko Buy krny kaliye b tou hm Cash de rhy, jo k Assets ha, tou uska Decrease hna Credit. -> Ab yha sirf Assets side me Debit and Credit ho rha. Other side p kuch nhi ha.

→ Imp: Accounts me Goods ka name kbhi nhi use krna hta, blky event likhty jis waja se wo goods ai ya gyr, Ab jesy k yha Goods ko purchase kiya tou Purchase Account Debit likhy gy.

→ **Hm jo Things buy krty ha wo 2 Nature ki hti ha:**

1- Goods: Jo hmny business me buy kr k direct sale krni hti ya manufacturing me use kr k then sale. Goods ko hm Expense ki nature me convert kr dety ha.

2- Non-Goods(Assets): Jis ka purpose sale krna nhi hta, hmny Isy business me use krna ya apply krna hta ha. Like building, Furniture,...

→ Hm Goods kaliye aik hi account "goods Account" nhi maintain kr skty, Goods khareedy jb tou "Purchase account" me entry ho gi aur jb sale kry tou "Sales account" me entry ho gi, Agr supp aik hi account hta goods account -> tou hm 1000 k buy kr rhy, entry ki, 1200 ka sale kr rhy same goods account me entry ki ab profit nikalna tou ye 1000-1200 tou negative me chla jaye ga. Profit ki calculation asaan bnany kaliye hm ne ye separate accounts ki traf move kya..

Example 3- Sold Goods for Cash 5000/-

Goods hmara asset ha, Tou hm sale kr rhy means Sales account credit ho ga, Aur Cash mil rha jo k Asset ha again, tou ismy increase Debit ha.

Example 4- Purchased Goods from Mohan on credit worth 4500/-

Goods purchase ki tou Purchase account me increase Debit ha, Lkn hm ne abhi payment nhi ki. Hm ny Mohan se udharr lya 4500 ka. Tou ye liabilities me increase ha jo k Credit.

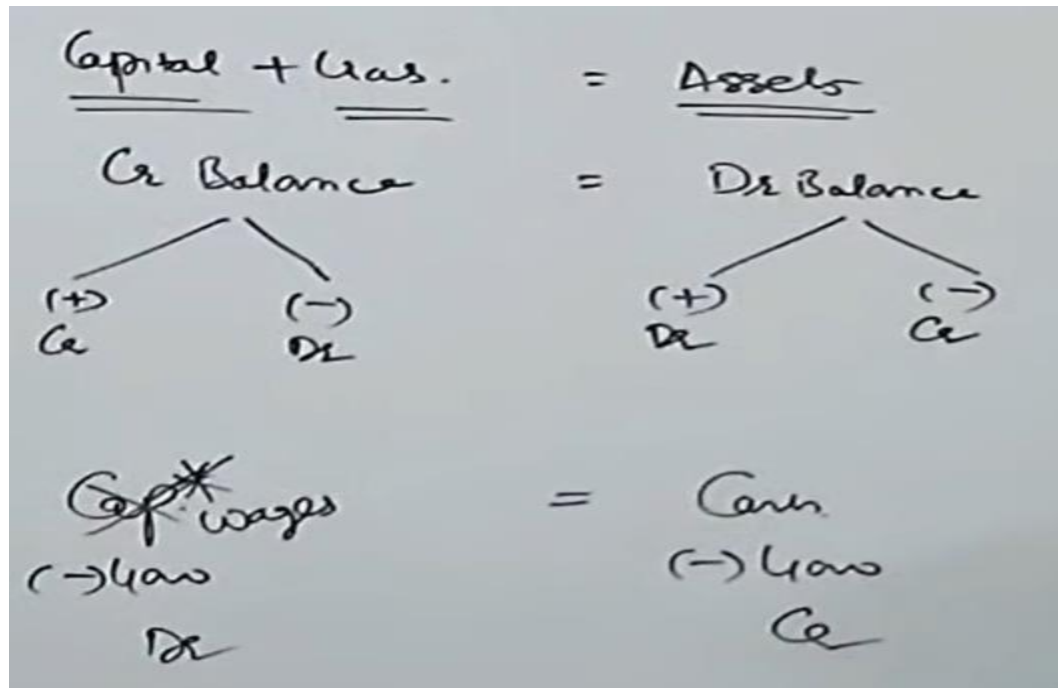

Example 5- Sold Goods to Sohan on credit 2000/-

Sales account credit krty , but hmy payment abhi nhi mili tou Assets me hi Sohan k name se account create kr k 2000 ka increase kry gy jo k debit.

Example 6- Paid wages amounted to 4000/-

Cash nikly ga 4000, Cash account credit. **Ye jo payment hti ha wages, Salaries, Commission, fees, etc ismy koi asset generate nhi hta, ye sb services ki payment hti, ismy hm kehty k paisy dye tou expense, paisy mily tou income. Aur hr income and expense ka affect capital p hta ha. Capital subtract.**

↳ Imp : Capital ka name nhi likhna direct, jis reason se capital me increase or decrease huwa wo cause likhna.

Example 6- Received commission of 2000

Cash mila ha tou Cash Account debit, Commission mila means capital me increase Credit.
Reason Commission.

Example 7- Goods returned by Sohan worth 1500/-

Goods increase huye tou Goods account debit, aur hmse ye saman udhar p le gya tha tou isy asset me Sohan ka account create kiya tha k isy paisy leny hain, ab wo credit ho jaye ga.

Example 8- Returned Goods to Mohan worth 1000 /-

Goods hmny wapis kr dye, asset me decrease tou credit, aur hmy Mohan se udhar p lya tha tou iska liabilities me account create tha ab wo debit ho aye ga

Example 9- Cash received from Sohan of 1200/-

Ab yha 2 approaches ho skti,

→ Aik ye k sohan hmara customer usny udharr pr saman lya tha tou ab wo paisy de gya. Then Cash account debit aur sohan hmny account bnaya tha k wo paisa dde ga tou ab credit

→ aik k hmny sohan se udhar lya tou cash account debit, aur hmny udharr lya tou liability create ho jaye gi of 1200 tou ye credit.

Example 10- Purchase furniture from Deepak worth 5000

Furniture ka account create ho ga assets me aur wo debit ho ga, aur hmny udharr lya tou liability create ho Deepak account se aur wo credit

Agr purchase ya sele ki kuch aur person ka naam mention jisy ki ya jisy cheez di tou maan lety ha k wo udharr ha
